

Maggie Hong

Data Analyst

+1 434-227-1714 | maggie.a.hong@gmail.com | Charlottesville, VA

<https://www.linkedin.com/in/maggiehongux/> | <https://maggiesdata.vercel.app/>

Versatile data analyst skilled in transforming complex data into actionable insights. Proficient in a wide range of tools including Excel, SQL (MySQL), Tableau, Power BI, and more. Passionate about uncovering patterns, solving problems, and driving informed decision-making through data.

Professional Experience

Job Market Skills Analyst (Data Career Jumpstart) Remote | May 2025-Present

- Developed an interactive Tableau dashboard from 1,000+ job listings on FindaDataJob.com
- Analysed job listing data to identify top 3 in-demand skills for data analysts
- Utilized insights to support targeted resume optimization strategies

Operations Data Analyst- Food Service (Chick fil-A Inc.) In-Person | July 2024-Present

- Analysed order trends to streamline food preparation, optimizing workflows for 100+ customer orders per hour
- Ensured compliance with food safety by double-checking item counts and maintaining quality standards
- Improved operational throughput by evaluating processes, preparing an additional 100+ food items per hour
- Tracked and recorded food waste data accurately inputting figures into systems for inventory and waste reduction analysis

E-Commerce Operations Analyst (Whole Foods Market) In-Person | April 2022-June 2024

- Analysed and optimized routing strategies, increasing operational efficiency and maximizing fulfilment capacity
- Conducted quality assurance checks on over 2,000+ orders to ensure item accuracy and integrity
- Monitored and recorded performance metrics, consistently maintaining an average of 150+ items per hour
- Identified and applied efficiency improvements using data insights from performance tracking

Projects

NBA 2022 Stats

Created a fully functional Tableau dashboard for NBA 2022 stats

- Used Tableau to analyse and visualize 2022 NBA stats across all 30 teams focusing on 3-point shot frequency by position and player metrics (points, assists, rebounds)
- Identified a strong positive correlation between assists and total points—insights used to recommend strategies for optimizing team playmaking and offensive efficiency

Healthcare Analysis

Wrote SQL queries in MySQL to analyse data for hospital

- Leveraged SQL to analyse 100,000+ patient records, uncovering key trends in hospital stays, procedures, and medication use
- Identified a strong correlation between procedure count and length of stay, widespread insulin use across all age groups, and cardiovascular specialties as most prevalent insights aimed at improving patient care and healthcare decision-making

Food Delivery Service Campaign

Analysed Food Delivery Data and created data visualizations to show trends in Excel

- Utilized Excel to clean, analyse, and visualize 10,000+ rows of campaign data, uncovering performance trends and identifying optimization opportunities that led to a 15% increase in ROI and improved targeting strategies for future campaigns

Technical Skills

Programming Languages: SQL (MySQL), Python, R, Java

Tools & Other platforms: Excel, Tableau, Power BI, GitHub

Other: Data Analysis, Collaboration, Communication, Detail Oriented, Efficient, Customer Service

Education

Certificates: Data Analytics Accelerator, Frontend Simplified

January 2025-June 2025

Degrees: BS Psychology

August 2020-December 2024

Other
